

Enhance Your Partnership

Nearly 60% of adults with a mental health condition received no treatment in 2020. Let's change that.

It's never been more important to provide affordable and accessible mental health care. We're here to help you do it. By enhancing your partnership with SonderMind through medical behavioral integration (MBI), together we can help patients feel better, faster.

THREE MODELS OF CARE:

In-Network Behavioral Health

Refer a patient to a licensed, available, in-network therapist via fax, phone, secure email, or online. Your patient is connected with a therapist within 48 hours after the referral is submitted.

Integrated Therapist

Select a SonderMind therapist to work specifically with your practice. An Integrated Therapist acts as an extension of your care team, providing mental health care services for your patients, either on-site or through SonderMind's Video Telehealth™ platform.

Collaborative Care Model (CoCM)

Work with a Behavioral Health Care Manager and a consulting psychiatrist to deliver a patient-centered, population health approach to behavioral health in your primary care practice. With CoCM, your practice can seamlessly transition patients requiring in-depth and ongoing mental health care to a SonderMind therapist.

Email partnership@sondermind.com or call (720) 674-8866 to learn more about which models of care are best for your practice.
